Part B. CV SUMMARY

Raquel Tarazona Lafarga is Professor of Immunology at the University of Extremadura. She obtained her Degree of Medicine (1986) and her PhD degree (1992) at Complutense University of Madrid. From 1987 to 1991 she had a Predoctoral Fellowship for the Training of Research Staff of the Ministry of Science and Education (FPI) with 2 short stays at the Moredun Research Institute in Edinburgh. From 1993 to 1996 she had a Marie Curie postdoc contract from the European Union at the National Institute for Medical Research (Mill Hill) in London. In October 1996, she got a 3 year "Reincorporation Contract" from the Ministry of Education and Science (area of Immunology at the University of Córdoba). From 1999 to 2002 she obtained a FIS contract for researchers, (currently termed Miguel Servet contracts) at Dept. Immunology, Reina Sofía University Hospital in Córdoba. In 2002 she obtained a "Ramón y Cajal" contract from the Ministry of Science and Technology. In the same year she obtained the position of "Professor Titular de Universidad" in Immunology and in August 2018 a Full Professor position at the University of Extremadura. She has a positive evaluation of 5 six-year research periods (1990-2020) and is the coordinator of the Research Group "Tumor Immunopathology" from Junta de Extremadura.

Scientific contributions. Since 2000 and continuously to the present, she has been Principal Investigator of 6 projects of national calls and 7 projects of the Autonomous Community of Extremadura. She is co-author of 2 national patents (2222769 and 2198203) and one of European scope (Application Number: PCT/EP2012/054251). At the University of Córdoba, she participated as a member of the research team led by Prof. Rafael Solana in three European calls, ImAginE and T-CIA (coordinated by Prof. Pawelec) and OISTER (coordinated by Prof. Schadendorf). In recent years her research has focused on the analysis of the interactions between tumor cells and NK cells, analyzing inhibitory receptors such as TIGIT, TIM3, LAG3 and PD1 expressed on NK cells and cytokine-induced cytokine (CIK) cells in patients with acute myeloid leukemia. According to the ISI Web of Science bibliometric analysis (January 2023): she is co-author of 78 scientific articles in indexed journals (39 as first, last, or corresponding author; h index: 32; Total number of citations: 3442; Average number of citations per item: 47,26. In the period 2012-2022: 43 publications (23 as first, last, or corresponding author). Total number of citations: 1956. Average number of citations per item: 48,33. She is co-author of 10 book chapters and has directed 5 PhD theses (4 in the last 10 years).

Contributions to society. Since her incorporation to the University of Extremadura she has participated in 4 collaborations with different industries. Currently, she has a collaboration with

Fundación Pethema (Programa Español de Tratamientos en Hematología) related to the study of NK cells in AML patients.
